PROJECTS

AI Resume Analyzer — React.js, Node.js, LLM API, JavaScript, Vercel — 2025 – Present

Live: resumeai-flame-zeta.vercel.app

- Architected and deployed an AI-powered full-stack web application that parses and analyzes resumes against target job descriptions using LLM API integration, providing real-time keyword gap analysis and ATS optimization recommendations.
- Sole developer handling end-to-end product delivery: responsive React.js user interface, backend API route orchestration, rigorous edge-case testing, and continuous cloud deployment on Vercel.

Fitverse — Virtual Clothing Fit Checker — React.js, Computer Vision API, JavaScript — 2025

Repository: github.com/Navnit1

- Developed an interactive e-commerce web application facilitating virtual clothing fit-checking via computer vision API integration, reducing fit uncertainty and enhancing the online shopping workflow.
- Engineered clean, reusable React.js components for product catalog browsing, image capture, and API payload handling with intuitive state management.
